Hannin Creek Education and Applied Research Centre (HCEARC)

Contributing organization(s) :

Saskatchewan Polytechnic and Saskatchewan Wildlife Federation

Rationale:

We define sustainability as 'the management of our resources in a manner which does not deplete their availability for future generations'. The HCEARC is located on a watershed in a remote area of the mid-boreal forest ecosystem of central Saskatchewan, surrounded by a Provincial Game Preserve with an abundance of natural forests, wildlife, birds and fish. For over 40 years, students have participated in hands-on applied learning in sampling, data collection, testing and analysis, laboratory and field experiences, simulated investigations, wilderness survival, and applied research.
